

Description:

The Elite industrial air blowers deliver much-needed air circulation in environments that are often crowded or impacted by the spread of dust, germs and other harmful particles in the atmosphere. Professional air blowers are often employed on construction sites to draw in all types of dust in the area and remove them, leaving only clean air in its place. These commercial blowers can also play a key role in speeding up the drying of plaster and other materials during construction work, as well as support the process of drying water damage during restoration projects.

Our units are equipped with powerful, energy-saving fans, designed to eliminate and filter dirty air from spaces in the most efficient and effective way possible.

Product Code: E300FE115

Specification:

- Power Supply: 110v 50Hz
- Max Air Flow: 3600 m³/h
- Max Air Pressure: 195 Pa
- Blade Diameter: 300mm
- Power Consumption: 520w
- Outlet Diameter: 32cm
- Dimensions: 35.8 x 32 x 40.5 cm (LxWxH)
- Weight: 14kg
