

## RHINO TQ3

The Highly efficient twin 1400w infra-red elements make the TQ3 a formidable tool for combating the elements.

Using high frequency heat waves that penetrate the air without heating it, TQ3 warms objects and people rather than the atmosphere. This results in lower running costs because Heat is not lost through drafts or pre-heating.

The TQ3 is constructed from a high-grade and heat resistant material, so it withstands up to the rigors of site use with ease.
