

QUALITY STEEL PROPS

Information Guide

Key features:

- Adjustable height across a range of size options
- Safety standard compliant
- Lightweight portability with heavy duty strength
- Non-permanent fixing
- Compatible with Strongboy wall support brackets

Ensure you know the minimum standards

As a long standing and experienced supplier of Props we only supply products that are fit for purpose and conform to the appropriate standards – non-compliant products could have dangerous consequences.

- All of our Props have an indelible traceability code stamped into both plates – we can trace right back to raw material
- All of our Prop Collars carry the distinctive "B" logo – a mark used for over 40 years by the manufacturer. This can be matched up with the prefix ID code to check it's origin
- In house testing equipment at our manufacturer enables strict quality control
- Props are FULLY TESTED to the appropriate standard – multiple props of each size are tested to the various extension points to enable the loading table to be compiled

- Outer tube 60.3mm, inner tube 48.3mm diameter
- Steel is produced to S355, which is high yield to bend, hold and recover under load
- Threaded portion is friction welded to the outer tube to increase strength and durability
- Holds a load in excess of 12.5 tonnes
- Tested in the UK and issued with certificates of conformity to Prop standard, BS4074

Adjustable Steel Props are available in sizes:

- Size no. 0 = 1.04m to 1.83m
- Size no. 1 = 1.75m to 3.12m
- Size no. 2 = 1.98m to 3.35m
- Size no. 3 = 2.59m to 3.96m
- Size no. 4 = 3.20m to 4.88m
