

DeWALT Power Tools (DEWDT1934QZ)

Portable Construction Circular Saw Blade 165 x 20mm x 24T

DEWALT Construction Circular Saw Blade for use with portable machines to cut softwoods and composite materials. The impact resistant carbide teeth help to reduce the chance of chipping or breaking a tooth. With ultra sharp cutting edges and Alternate Top Bevel (ATB) teeth to reduce splinters. The blade features a wedge shoulder to protect the carbide from nail impact. The fast smooth cutting action and durable construction makes it ideal for demanding jobsite operations: rough timber and cutting through embedded nails. This DEWALT Construction Circular Saw Blade is for the cutting of rough timber possibly with embedded nails.

Specification

Blade Diameter 165mm

Blade Bore 20mm

Tooth Count 24

Plate Thickness 1.2mm

Kerf Thickness 1.8mm

Grind Type ATB

Rake Angle 43;10

Blade Diameter (mm)	No. Teeth	Bore Diameter (mm)	Rake (°)
160	24	20	10
Rake Type	-	-	-
